

Monthly Report: September 2017

Type: Cruise Ship: Emissions	Call Date: September 13, 2017	Call #: 55-42991	Caller ID: 55
Details of Concern:		Referred to: Norwegian Cruise Lines	
<p>Hey good afternoon. Yes, this is Sue Schreader pestering again but I'm really concerned. The Norwegian Jewel is just pulling in and I think that ship is on fire. There is the most dark, grey to black smoke coming out of the stacks. And yes, I know it's underway so it can emit more air emissions but I've never seen such dark grey sooty-looking smoke. So maybe somebody needs to check if their engines are on fire. This is incredible. So, I will be following up with DEC. Wow. You guys ought to come down and look at this, it's amazing the smoke coming out of this ship. I'm glad I don't live downtown. Bye.</p>			
Details of Response:			

Type: Other: Noise (Non-aircraft)	Call Date: September 15, 2017	Call #: 56-42993	Caller ID: 56
Details of Concern:		Referred to: Alaska Travel Adventures	
<p>This is Sue Arthur. I'd like to talk with somebody in charge of the rafting on the Mendenhall River. So please give me a call, thank you.</p>			
Details of Response:			
<p>ATA: To whom it may concern, I spoke with the caller and have addressed the concerns. Thank you.</p>
